

PORTABLE ELECTRONIC VIEWER SYSTEM

5

ABSTRACT OF THE DISCLOSURE

10 A portable electronic viewer system is provided for  
satisfying both the demand for portability and the demand  
for containing a large volume of contents. The portable  
electronic viewer system comprises a portable server  
division (500) provided with a hard disk (502) of 2.5  
inches or smaller for storing book-type information  
containing at least either images or characters and a  
15 viewer division (510) for displaying page-by-page the  
book-type information sent wirelessly from the portable  
server division at a transfer rate of less than 16Mbps.
